

LCD Keypad

Great for the Master Bedroom!
Hear the door chime notification across the house, know what doors are open, or arm / disarm from your bedroom. A second keypad is a great idea!

Remote Keychain

Think of it as a mobile keypad!
Keep this handy little remote in your purse, nightstand, or on your keys. Arm / Disarm the system as you leave or enter the house. Pick up a pair for your house and make it easy...

Motion Detector

Keep a watchful eye on things!
A properly placed motion detector can watch over your home and alert you of an interior movement. Got Pets? No problem, go with a Pet Immune model.

Exterior Siren

Get their attention!
A single standard interior siren may not be audible outside the house during an alarm event - this attic mounted siren is sure to draw some attention.

Carbon Monoxide

Odorless and Colorless - bad stuff!
With a Carbon Monoxide Communicator you can be alerted before dangerous levels of gas can fill the home.

Glass Break

Stop the smash and grab!
If your home has large sliding glass doors or big picture windows—you may want to protect those areas with a Glassbreak Communicator.

Fire Communicator

Limit the damage a Fire can cause!
Alerts the Monitoring Center to smoke in your home and can dispatch the Fire Department and emergency response. May qualify for additional homeowners insurance discounts. Does not replace code required smoke detectors.

Digital Backup

Phone lines can be sabotaged!
Our GSM Module communicates an emergency signal wirelessly to the Monitoring Center without relying on the vulnerable home phone line.

Service Warranty

We do live in the Lightning Capital!
When added to your account, this Service Warranty covers the replacement and repair costs due to unexpected equipment failures, including damage caused by electrical surge.
